

Identification cards — Recording technique —

Part 9: Tactile identifier mark

ICS 35.240.15

National foreword

This British Standard is the UK implementation of ISO/IEC 7811-9:2008.

The UK participation in its preparation was entrusted to Technical Committee IST/17, Cards and personal identification.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 July 2008

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 7811-9 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 17, *Cards and personal identification*.

ISO/IEC 7811 consists of the following parts, under the general title *Identification cards — Recording technique*:

- ↓ *Part 1: Embossing*
- ↓ *Part 2: Magnetic stripe — Low coercivity*
- ↓ *Part 6: Magnetic stripe — High coercivity*
- ↓ *Part 7: Magnetic stripe — High coercivity, high density*
- ↓ *Part 8: Magnetic stripe — Coercivity of 51,7 kA/m (650 Oe)*
- ↓ *Part 9: Tactile identifier mark*

Identification cards — Recording technique —

Part 9: Tactile identifier mark

1 Scope

This part of ISO/IEC 7811 specifies the physical characteristics of a tactile identifier mark used by visually-impaired card holders to distinguish their cards. It defines the area on the card for the tactile identifier mark (TIM) and the layout of Braille-style embossed dots arranged in patterns to enable easy tactile recognition.

2 Conformance

A TIM is in conformance with this part of ISO/IEC 7811 if it meets all mandatory requirements, and optional requirements as specified.

3 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO/IEC 7810, *Identification cards — Physical characteristics*

ISO/IEC 7811-1, *Identification cards — Recording technique — Part 1: Embossing*

4 Terms, definitions and abbreviations

4.1 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO/IEC 7810 and the following apply.

4.1.1

embossed

raised in relief from the front surface of the card by adding or reacting card material, or by deforming the card material from the opposite side

4.2 Abbreviations

TIM tactile identifier mark

5 TIM physical characteristics

5.1 Location of TIM

The TIM should be located on the front surface of the card in the area shown in Figure 1.

The TIM shall not be located outside the Name and address area defined by ISO/IEC 7811-1.

Regardless of TIM location, all other raised areas shall be at least 1 mm from the edge of any TIM.

NOTE Certain embossing techniques can damage card components that exist in TIM area.

dimensions in millimetres (inches)

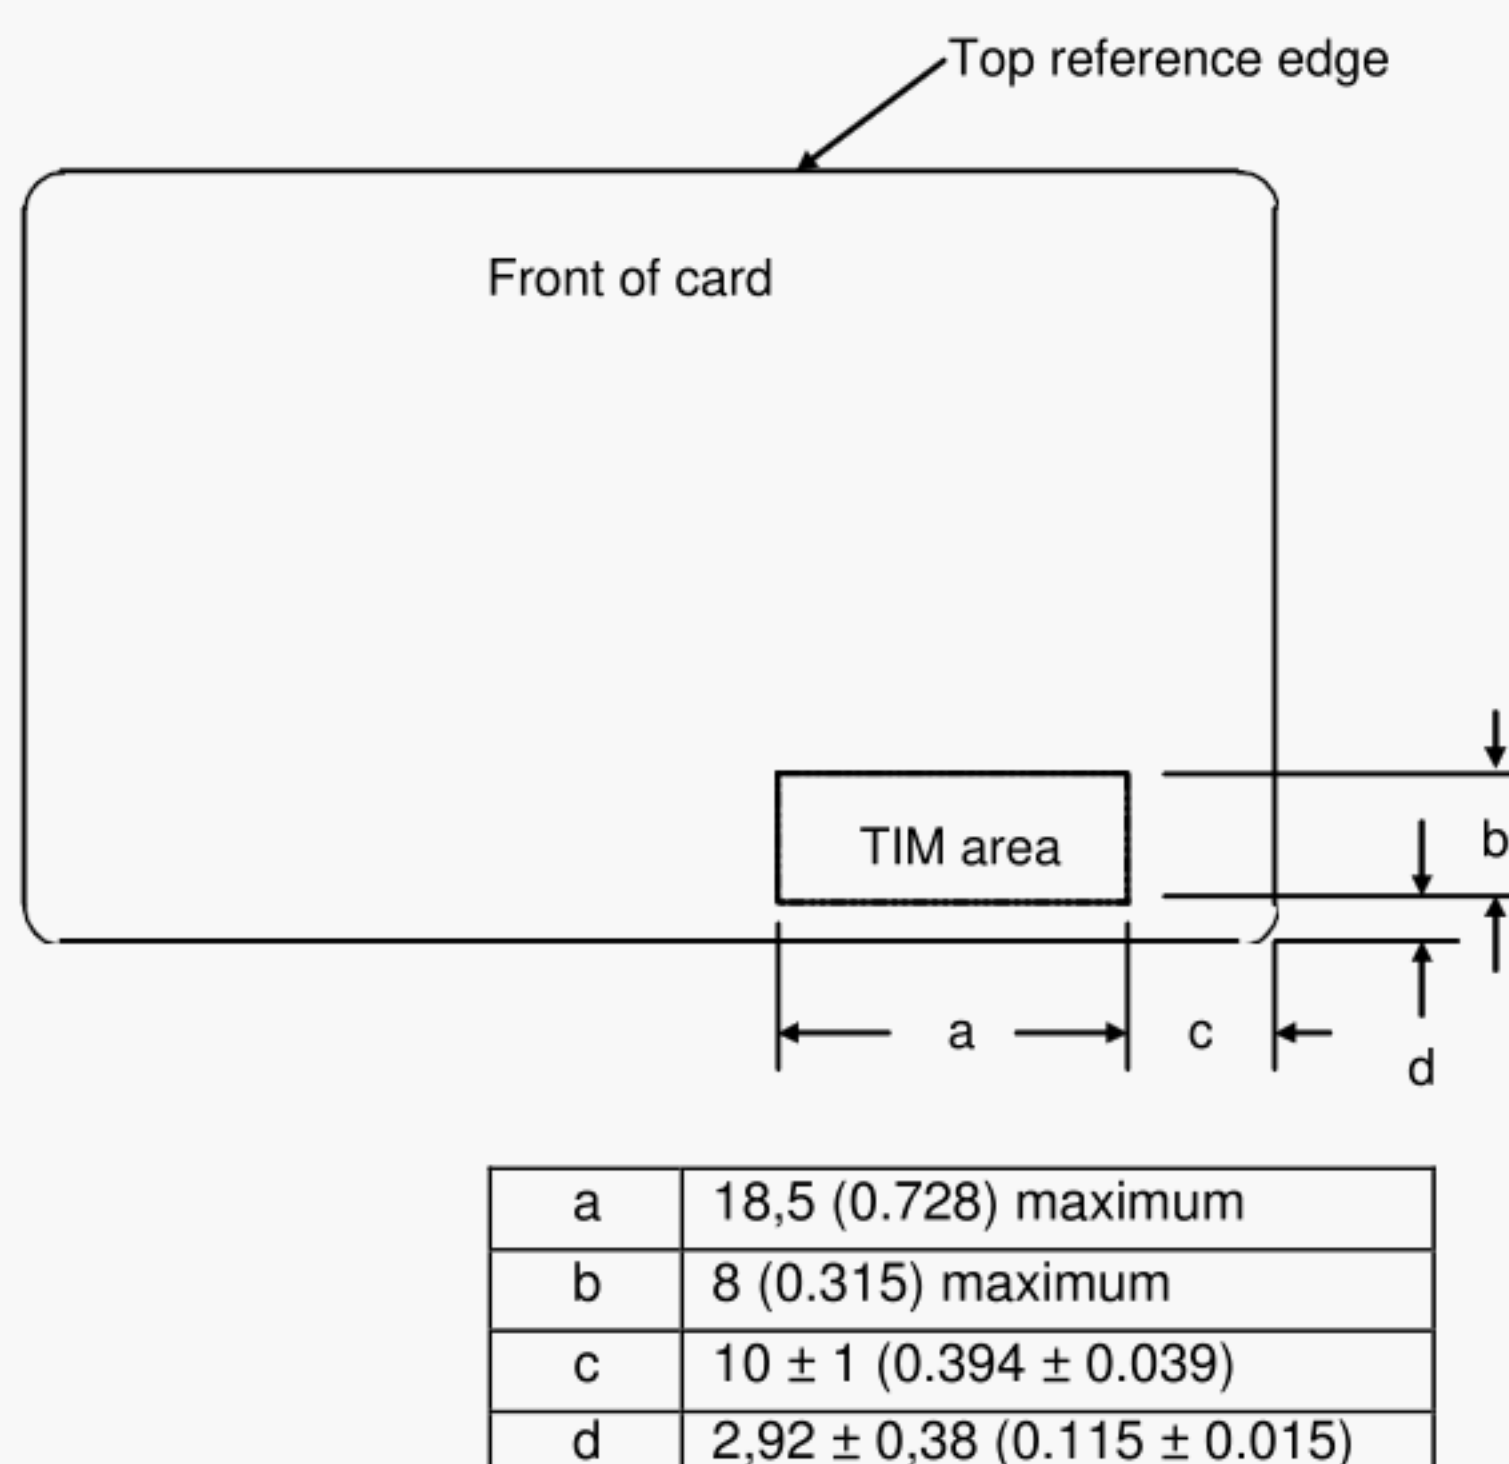

Figure 1 — Recommended TIM area

5.2 TIM dot arrangement

The TIM shall be composed of a maximum of 3 groups of 6 dots arranged as shown in Figure 2.

a	2,3 (0.091)
b	4,6 (0.181)
c	2,3 (0.091) 3 places
d	6,1 (0.240)
e	12,2 (0.480)

Figure 2 — Arrangement of TIM dots

5.3 Dot dimensions

Dots used to make up the TIM shall have a relief height of 0,48 mm (0.019 inch) maximum and 0,3 mm (0.012 inch) minimum above the adjacent surface of the card. The shape of each dot is not specified; examples are shown in Figure 3.

Figure 3 — TIM dot base size and shape illustration a

5.4 Sign design

It is recommended that the card holder select which of the 18 possible dots are to be raised. The maximum number of raised dots is 18 and the minimum is 1.

NOTE Since there are individual differences in discernment by the tactile sense, it is recommended that the card holder be able to use the combination of the dots that is easy for them to discriminate.

British Standards Institute (BSI)

BSI is the independent national body responsible for preparing British Standards. It presents the UK view on standards in Europe and at the international level. It is incorporated by Royal Charter.

Revisions

British Standards are updated by amendment or revision. Users of British Standards should make sure that they possess the latest amendments or editions.

It is the constant aim of BSI to improve the quality of our products and services. We would be grateful if anyone finding an inaccuracy or ambiguity while using this British Standard would inform the Secretary of the technical committee responsible, the identity of which can be found on the inside front cover.

Tel: +44 (0)20 8996 9000 Fax: +44 (0)20 8996 7400

BSI offers members an individual updating service called PLUS which ensures that subscribers automatically receive the latest editions of standards.

Buying standards

Orders for all BSI, international and foreign standards publications should be addressed to Customer Services.

Tel: +44 (0)20 8996 9001 Fax: +44 (0)20 8996 7001

Email: orders@bsigroup.com

You may also buy directly using a debit/credit card from the BSI Shop on the Website <http://www.bsigroup.com/shop>.

In response to orders for international standards, it is BSI policy to supply the BSI implementation of those that have been published as British Standards, unless otherwise requested.

Information on standards

BSI provides a wide range of information on national, European and international standards through its Library and its Technical Help to Exporters Service. Various BSI electronic information services are also available which give details on all its products and services. Contact the Information Centre.

Tel: +44 (0)20 8996 7111 Fax: +44 (0)20 8996 7048

Email: info@bsigroup.com

Subscribing members of BSI are kept up to date with standards developments and receive substantial discounts on the purchase price of standards. For details of these and other benefits contact Membership Administration.

Tel: +44 (0)20 8996 7002 Fax: +44 (0)20 8996 7001

Email: membership@bsigroup.com

Information regarding online access to British Standards via British Standards Online can be found at <http://www.bsigroup.com/BSOL>.

Further information about BSI is available on the BSI website at <http://www.bsigroup.com>.
